### News

The British Embassy continues to emphasise the importance of equal access to vaccines for all. These issues were raised most recently at a meeting with the Ministry Of Foreign Affairs on 9th July. **We continue to receive assurances that vulnerable British Nationals will be vaccinated at the same rate as Thai nationals. You can find Thailand's definition of vulnerable on the Intervac website.**

**In many areas of Thailand there are limited supplies of vaccines and registration and vaccination programmes have been temporarily suspended. In the areas most affected by COVID-19 there is increasing pressure on medical services. You may find it difficult to access COVID-19 testing and medical care.**

The CCSA has confirmed that foreigners in Thailand should not contact their Embassy to register for a vaccine. If a hospital advises you to contact the Embassy to register you should explain this to them.

Some private hospitals are accepting registrations for the Moderna vaccine, which is expected to be available from October. You may need to pay in advance.

The only vaccines that have been approved and procured for use in Thailand are AstraZeneca, Sinovac and Sinopharm. You may not be able to choose which you receive. You should contact the hospital or vaccination centre for more information.

**Foreigners in Bangkok can register for a COVID test at the Thai-Japanese Stadium, Bangkok via the Thai social security website. You will need to provide your passport details.**

**Pharmacists are now selling rapid antigen tests for COVID-19.**
